

## **How we are dealing with Covid 19 To Keep Everyone Safe**

- Our paramount aim is to keep you safe.
- We also want to keep your fellow passengers safe, our staff and the residents of Orkney safe too. With this in mind the Scottish Government would encourage visitors to the Orkney Islands to undertake two lateral flow tests (one test 3 days prior and the other on the morning of departure. If these tests are positive or you have any symptoms please not travel. The tests are completely voluntary.
- Please socially distance while on the pier and onboard our vessel MV Pentland Venture and onboard our coach in Orkney. Capacity limits are reduced to allow you to do this in accordance with Scottish Government Guidelines.
- To keep you safe our coaches are fitted with Eco3 air purification systems and covid secure mitigations in place. Our driver will guide you through these protocols on arrival on the Islands.
- While in the office, in the saloon of our vessel and while on our coach please wear face coverings. You should take your own face coverings with you.
- You may be able to remove face coverings on the deck of The Pentland Venture while seated as long as you can socially distance from fellow travellers outwith your household in line with Scottish Government Guidelines.
- Please use hand gel as often as possible.

**And Remember – Please have a Great Day with John O’Groats Ferries!**
